

WORK SAMPLE | SERVICES OVERVIEW

HRE Consulting Services Overview

Practical support for professionals, founders, and teams that need clearer direction, better systems, and stronger execution.

Built to show what we do, how engagements are structured, and what a client can expect from the work.

WHAT WE HELP WITH

Four service lines, one execution-minded approach.

Each service is designed to clarify the goal, strengthen the system around the work, and create practical outputs a client can use immediately.

01

Career & Company Development

Executive resumes, LinkedIn optimization, career positioning, networking support, and team/talent visibility.

02

Planning & Project Delivery

Fractional PMO, project leadership, operating cadence, ownership models, timelines, and status reporting.

03

Automation & Optimization

AI-ready SOPs, workflow mapping, low-code automation, process redesign, and practical tool implementation.

04

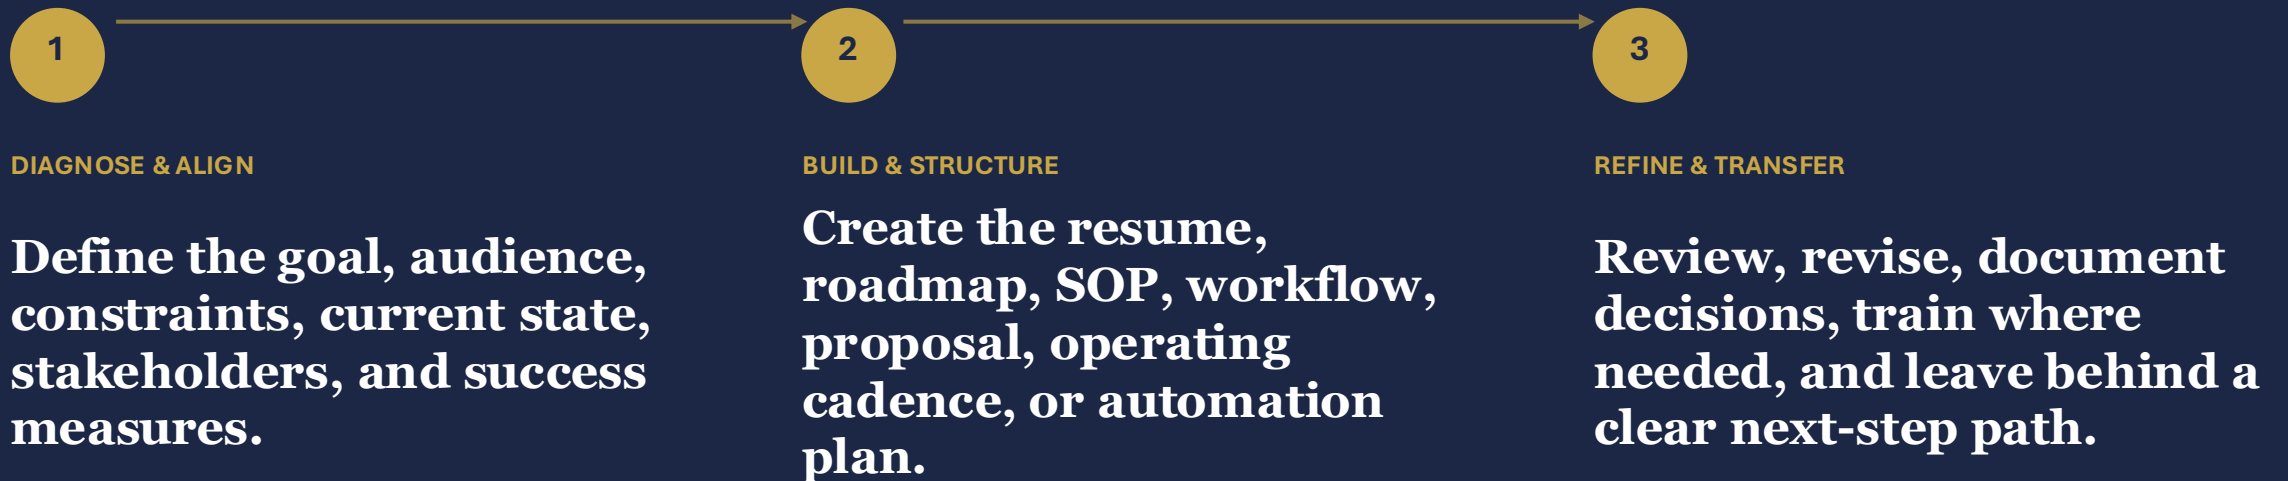

GovCon Procurement & Proposal Support

Capture strategy, bid/no-bid structure, RFP response support, compliance matrices, and proposal review discipline.

HOW THE WORK PROGRESSES

A controlled path from unclear need to usable output.

Engagements stay practical: start with the actual problem, build the smallest useful system or asset, then refine it for adoption.

This structure is flexible enough for career development, internal operations, automation, PMO support, and proposal work without turning every engagement into a large consulting project.

WHAT A CLIENT CAN EXPECT

Clear deliverables, practical handoff, and next-step momentum.

The exact scope changes by need, but the work is designed to produce reviewable assets, stronger decision-making, and a cleaner path forward.

Career / Company	Resume, LinkedIn profile, positioning narrative, target-role strategy, outreach language, or talent process recommendations.
Operations / PMO	Project roadmap, meeting cadence, ownership model, reporting rhythm, risk tracker, implementation plan, or decision log.
Automation / SOPs	Workflow map, SOP library, automation requirements, tool buildout plan, QA checklist, or handoff documentation.
GovCon / Proposals	Bid assessment, compliance matrix, proposal outline, writing plan, review schedule, and section-level recommendations.

Best fit: clients who need structure, stronger execution, clearer ownership, or sharper positioning—without unnecessary complexity.
